

Codebook: Development Policies After War

Shelley Liu, Duke University
shelley.liu@duke.edu

Instructions and description

This dataset covers state-building policies reform and implementation for the period *before* conflict termination and for the *post-war* period. **Our primary goal is to identify how conflict termination changed policies.**

- **Before conflict termination** includes the policies that were in place until conflict has ended.
 - Policies that are substantially in place during war, particularly for longer conflicts, are considered as before conflict termination.
 - Double check to confirm cited laws/policies—especially very old ones—haven't been repealed or replaced by something new.
- **Post-war/after conflict termination** is defined as either:
 1. The period between 0 and 10 years after war has concluded, or
 2. The post-war regime, if regime change occurs before 10 years

You will be assigned one conflict at a time. The conflict assignment will include conflict names, date of start and end, main conflict issue, and how the conflict ended. With this, conduct a comprehensive search for answers to the following questions in the 10 years after war has concluded. Good sources of information are NGO/international organization reports (e.g. Human Rights Watch), Google Scholar, and/or Duke Library. You could also consider consulting Lexis Nexis Academic for historical newspaper articles.

Deliverables per conflict

- Write response for each variable in the codebook. Length of response varies based on amount of info needed to accurately describe the situation.
- For each response, please include the formal name of the policy, document, law, or declaration etc if possible.
- If there are any questions you need to clarify, please **add a comment in the note column** so that I can review it. If relevant, please include additional information/quotes in the comment.
- **Doc naming:** endyear_country_narrative_yourinitials (e.g. 1979_Zimbabwe_narrative_sxl)

Reminders

- All sources **must be comprehensively cited** using Chicago Style Author-date citation formal. Cite sources in parentheses (see [here for instructions](#)) within the written document, and then finally in a Works Cited section at the end of the document. **If you quote directly from a source, it must be enclosed in quotation marks.**
- For formal policies, writing down the name/number of exact policy documentation, laws, proclamations, notices, etc. are preferred.

Codebook

Primary and Secondary School Education

Policy before conflict termination. This includes anything implemented by the government up until the year that conflict ends.

*Note: Please code for the **dominant policy** that was in place. E.g. if policy A was in place throughout most of the conflict but policy B was implemented a year before conflict termination, please code according to policy A but note policy B as well in the narrative.*

- Prior to conflict termination, what was the previous education access? *Code based on access to public or government administered or government-administered schools.*
 - **[educ_pre_restrict_quota]**: Formal restrictions existed such that population groups' access to education was restricted through a quota system: all groups in society were allowed to access education, but the group's access was capped based on percentage. (Yes = 1, No = 0, year if yes)
 - **[educ_pre_restrict_full]**: Formal restrictions existed such that population groups' access to public school or government-provided education was entirely or near-entirely restricted for one or a few groups. Please note that such restrictions may exist even if members of the population are allowed to attend private, NGO, religious, etc. schools. (Choose if, e.g. some ethnic groups or genders were not allowed to attend secondary school.) (Yes = 1, No = 0, year if yes)
 - **[educ_pre_restrict_informal]**: Restrictions were informally imposed due to societal discrimination, on top of any formal restrictions. *Yes only if ethnic groups or genders identified major barriers to entry specifically due to their ethnic or gender identity. Do not choose this option if educational barriers are predominantly due to poverty.* (Yes = 1, No = 0)
 - **[educ_pre_restrict_other]**: Other restrictions: explain, and year.
 - **[educ_pre_restrict_group]**: *If restrictions existed.* Which group was restricted?
- *If formally restricted.* Were the following levels of education restricted? (Yes = 1, No = 0)
 - **[educ_pre_restrictpri]** Primary school formally restricted
 - **[educ_pre_restrictsec]** Secondary school formally restricted
 - **[educ_pre_restricttert]** University formally restricted
- Prior to conflict termination, were there the following types of schools in the country? (Yes = 1, No = 0)
 - **[educ_pre_types_priv]** Private schools
 - **[educ_pre_types_relig]** Religious schools
 - **[educ_pre_types_pub]** Public schools

In the 10 years after conflict termination (or, if regime change, within the post-war regime):

- After war, what is the level of education access? *Code based on post-reform characteristics if reforms occurred, meaning that if reform occurred 3 years after the end of war, code based on the reform. If no reform occurred, then keep same coding as pre-war. Code based on access to public or government administered or government-administered schools.*
 - **[educ_post_restrict_quota]**: Formal restrictions existed such that population groups' access to education was restricted through a quota system: all groups in society were allowed to access education, but the group's access was capped based on percentage. (Yes = 1, No = 0, year if yes)
 - **[educ_post_restrict_full]**: Formal restrictions existed such that population groups' access to public school or government-provided education was entirely or near-entirely restricted for one or a few groups. Please note that such restrictions may exist even if members of the population are allowed to attend private, NGO, religious, etc. schools. (Choose if, e.g. some ethnic groups or genders were not allowed to attend secondary school.) (Yes = 1, No = 0, year if yes)
 - **[educ_post_restrict_informal]**: Restrictions were informally imposed due to societal discrimination, on top of any formal restrictions. *Yes only if ethnic groups or genders identified major barriers to entry specifically due to their ethnic or gender identity. Do not choose this option if educational barriers are predominantly due to poverty.* (Yes = 1, No = 0)
 - **[educ_post_restrict_fund]**: Was support and/or funding for schooling reduced, such that it meaningfully limited education access or quality for segments of the population? Income-based limitations should be coded as yes here. (Yes = 1, No = 0, year if yes)
 - **[educ_post_restrict_other]** Other restrictions: explain, and year.
 - **[educ_post_restrict_group]**: *If restrictions existed.* Which group(s) were restricted?
- After war, are there the following types of schools in the country? (Yes = 1, No = 0)
 - **[educ_post_types_priv]** Private schools
 - **[educ_post_types_relig]** Religious schools
 - **[educ_post_types_pub]** Public schools
- **[educ_post_restrict_cleav]** *If restricted (else write NA):* Were restricted groups a primary or secondary cleavage in the civil war?
 1. No, restricted groups were not part of the war
 2. Secondary cleavage: restricted groups were not the main players in the war, but did ally with one of the main players.
 3. Primary cleavage: restricted groups were a primary player in the war.
- **[educ_post_restrict_year]** *If restricted:* What year(s) was restriction imposed?

- **[educ_post_expand]** Has education been **expanded** for any group in society? That is, groups of students who previously had lesser access to education but now have greater access. *If both formal and informal expansions, code based on formal expansion. Code based on access to public or government administered or government-administered schools.*
 1. No
 2. Informal expansion: there were no formal restrictions prior, but groups in society can better access education because they are no longer discriminated against, etc.
 3. Formal expansion through quotas: some groups are now able to have greater access to education because their quotas have been expanded
 4. Complete formal expansion: previous formal policy prevented some groups in society from accessing education fully, but now everyone has full access to education

- **[educ_post_expand_year]** *If expanded:* What year(s) was expansion announced?

- **[educ_post_school_pol]** Has there been a formal expansion of **schools**, meaning large-scale projects to build more schools? Code based on government-conceived plans, not smaller-scale projects initiated by organizations (e.g. World Bank). However, note that government-conceived plans can still be financed by international organizations.
 1. No
 2. Partial expansion: government formally identified specific areas to build more schools
 3. Full expansion: school expansion is meant to roll out across the country

- **[educ_post_school_built]** *If partial/full expansion:* Were new schools actually built? Code based on government-conceived plans, not smaller-scale projects initiated by organizations (e.g. World Bank). However, note that government-conceived plans can still be financed by international organizations.
 1. No
 2. Partially implemented: schools were built, but projects not fully implemented (*select this if government decided to stop building, or there was a clear abandoning of the projects*)
 3. Fully implemented (*select this if there was a clear attempt to build all schools, even if there are complaints about there still not being enough schools, etc.*)

- **[educ_post_school_years]** *If partial/full expansion:* List all years in which the expansion was occurring, i.e. all years in which schools were being built as a result of the policy.

- **[educ_post_teachers]** Has there been an expansion of **teachers**, meaning a major push to train more teachers? (Yes = 1, No = 0, year if yes)

- Did the government enact policies mandating the following? (Yes = 1, No = 0, year if yes) *If*

these policies existed prior to conflict termination already, explain this in the narrative and code as 0.

- **[educ_post_pol_prim]** Mandatory primary schooling
 - **[educ_post_pol_free]** Free primary school education
 - **[educ_post_pol_lang]** Change in language of instruction
 - **[educ_post_pol_curr]** Changes in curriculum
- **[educ_post_other]** Have there been any other education policies or issues not covered by the questions above? Discuss briefly if yes.

Health

Policy before conflict termination

Note: Please code for the **dominant policy** that was in place. E.g. if policy A was in place throughout most of the conflict but policy B was implemented a year before conflict termination, please code according to policy A but note policy B as well in the narrative.

- **[health_pre_types]** Prior to conflict termination, what was the previous health access?
 1. Health access was not restricted for any groups in society.
 2. Health access was not formally segregated or restricted, but informal restrictions existed due to discrimination. *Choose only for systematic restrictions on ethnic groups or by gender.*
 3. Health access was formally segregated for certain groups in society, meaning that there were policies or laws mandating segregation or restrictions.
 4. Other forms of legal restrictions: explain.
- Prior to conflict termination, did the following health infrastructure exist? (Yes = 1, No = 0)
 - **[health_pre_types_priv]** Private hospitals or clinics
 - **[health_pre_types_pub]** Public hospitals
 - **[health_pre_types_relig]** Clinics tied to religious institutions, e.g. churches
 - **[health_pre_types_ngo]** NGO-administered clinics, e.g. Medicin Sans Frontieres
 - **[health_pre_types_gov]** Government-administered clinics
 - **[health_pre_types_comm]** Community-administered clinics. *These may be set up by local government or by community initiatives, but are not administered by the national government. The national government may set this up as part of a decentralized development plan, but once set up it is turned over to the community. Often a rural initiative, but sometimes also in urban communities/informal settlements.*
 - **[health_pre_types_trad]** Traditional healers not linked to the national government
- **[health_pre_chw]** Prior to conflict termination, did the government implement a community health worker (CHW) program? (Yes = 1, No = 0). *This may be referred to as village health workers or something similar. Generally, this involves training local nurses or healthcare workers to increase healthcare provision at the local level (within clinics, home visits, etc.) for illnesses/concerns that don't warrant going to the hospital. They are sometimes considered volunteers and are often paid little, often as a stipend rather than a real wage. See, E.g. in [Madagascar](#).*
- **[health_pre_chw_pay]** If CHWs existed. Were the CHWs paid?
 1. No payment: completely voluntary
 2. Modest stipend or remuneration. *Select this option also if: (a) CHWs were paid per visit or per patient; (b) CHWs were clearly underpaid.*
 3. Salary or wages paid: this is a full time position.

In the 10 years after conflict termination (or, if regime change, within the post-war regime):

- **[health_post_restrict_group]** After civil war, did any groups in society face additional restrictions to health care access? *code based on post-reform characteristics if reforms occurred.*
 1. No new restrictions
 2. Informal restrictions: no formal restrictions placed, but groups in society find that they have a harder time accessing health care due to discrimination.
 3. Formal restrictions: groups in society were faced with more barriers to healthcare access.
- **[health_post_restrict_fund]:** Was support and/or funding for healthcare reduced, such that it meaningfully limited healthcare access or quality for segments of the population? Income-based limitations should be coded as yes here. (Yes = 1, No = 0, year if yes)
- **[health_post_expand]** After civil war, did any groups in society enjoy expansions to health care access? *code based on post-reform characteristics to healthcare if reforms occurred.*
 1. No change in access
 2. Informal expansions: there were no formal restrictions prior, but groups in society now can better access healthcare because they are no longer discriminated against.
 3. Formal expansion through quotas: some groups are now able to have greater access to healthcare because their quotas have been expanded.
 4. Complete formal expansion: previous policies prevented some groups in society from accessing healthcare fully, but now everyone has full access to healthcare.
- After war, did the following health infrastructure exist? (Yes = 1, No = 0) *Code based on post-reform changes if reforms occurred.:*
 - **[health_post_types_priv]** Private hospitals or clinics
 - **[health_post_types_pub]** Public hospitals
 - **[health_post_types_relig]** Clinics tied to religious institutions, e.g. churches
 - **[health_post_types_ngo]** NGO-administered clinics, e.g. Medicin Sans Frontieres
 - **[health_post_types_gov]** Government-administered clinics
 - **[health_post_types_comm]** Community-administered clinics
 - **[health_post_types_trad]** Traditional healers not linked to the national government
- **[health_post_aidrestrict]** After war, did the government restrict aid workers from coming into the country?
 1. No restrictions
 2. Restricted access: aid workers allowed in some parts of the country but not others
 3. Restricted actions: aid workers allowed to engage in some types of health work but not other. *E.g. if care for women was restricted.*

- **[health_post_chw]** After war, did the government implement a community health worker (CHW) program? (Yes = 1, No = 0): *See above for definition of a community health worker.*
- **[health_post_chw_pay]** *If CHWs existed.* Were the CHWs paid after war?
 1. No payment: completely voluntary
 2. Modest stipend or remuneration. *Select this option also if: (a) CHWs were paid per visit or per patient; (b) CHWs were clearly underpaid.*
 3. Salary or wages paid: this is a full time position.
- After civil war, did the government expand health through the following? (Yes = 1, No = 0, year if yes) *If these existed prior, select yes only if there was a new wave of action/expansion.*
 1. **[health_post_vacc]** A **vaccination** campaign?
 2. **[health_post_dis]** A campaign to combat **water, airborne, or other preventable diseases**?
E.g. distributing mosquito nets, health education for communities, building latrines.
 3. **[health_post_nutri]** A campaign to increase **nutrition**? Include any farming initiatives aimed at improving crop nutrition.
 4. **[health_post_fem]** Healthcare for **women**?
 5. **[health_post_war]** Healthcare services for **war victims**?
 6. **[health_post_warcomp]** Additional compensation for **war victims**?
 7. **[health_post_vet]** Healthcare services for **ex-combatants of the war**?
 8. **[health_post_vetcomp]** Additional compensation for **ex-combatants of the war**?
- **[health_post_build]** Has there been a formal expansion of **clinics or hospitals**, meaning large-scale projects to build more clinics or hospitals? Code based on government-conceived plans, not smaller-scale projects initiated by organizations (e.g. World Bank). However, note that government-conceived plans can still be financed by international organizations.
 1. No
 2. Partial: government formally identified specific regions that would receive more clinics
 3. Full: clinic expansion is meant to roll out across the country
- **[health_post_clin_built]** *If partial/full expansion.* Were new clinics actually built? Code based on government-conceived plans, not smaller-scale projects initiated by organizations (e.g. World Bank). However, note that government-conceived plans can still be financed by international organizations.
 1. No
 2. Partially implemented: clinics were built, but projects not fully implemented. *Select this if government decided to stop building, or there was a clear abandoning of the projects.*
 3. Fully implemented. *Select this if there was a clear attempt to build all clinics, even if there are complaints about there still not being enough clinics, etc.*

- **[health_post_clin_years]** *If partial/full expansion.* List all years in which the expansion was occurring, i.e. all years in which clinics were being built as a result of the policy.
- **[health_post_person]** Has there been an expansion of **nurses and doctors**, meaning a formal push to train more of such healthcare personnel? (Yes = 1, No = 0, year if yes)
- **[health_post_other]** Have there been any other health policies or issues not covered by the questions above? *Discuss briefly if yes.*

Land and property

Policy before conflict termination

***Note:** policies that are substantially in place during war, particularly for longer conflicts, should still be considered as pre-war. This is because the primary goal here is to identify how conflict termination changed policies. Please code for the **dominant policy** that was in place. E.g. if policy A was in place throughout most of the conflict but policy B was implemented a year before conflict termination, please code according to policy A but note policy B as well in the narrative.*

- Before war, how did the government treat land and property?
 - **[land_pre_alloc_state]** At least a portion of the land was allocated by the state, i.e. the state rented land to people. (Yes = 1, No = 0)
 - **[land_pre_alloc_local]** At least a portion of the land was allocated by local leaders, institutions, or processes. For example: traditional or religious leaders, democratic processes at the village/community level, etc.(Yes = 1, No = 0) *Select this option if there were communal lands or reservations.*
 - **[land_pre_purch]** At least a portion of the land was available for purchase and private ownership (Yes = 1, No = 0)
- **[land_pre_alloc_restrict]** *Only if yes to allocations above.* Before war, was land allocations restricted for groups in society? If policies exclude foreigners, code as restriction **only** if the country's citizenship laws are designed to prevent certain ethnic groups from ever gaining citizenship (e.g. Ivoirité in Côte d'Ivoire).
 1. Land allocations was was not restricted for any groups in society.
 2. Land allocations was restricted through a quota system.
 3. Land allocations was formally segregated for certain groups in society. E.g. persons from a certain ethnic group would not be allowed to buy premium land, etc. *Select this option if only certain groups of people were required to live in communal lands or reservation areas.*
- **[land_pre_purch_restrict]** *Only if yes to purchase above.* Before war, was purchase of land restricted? If policies exclude foreigners, code as restriction **only** if the country's citizenship laws are designed to prevent certain ethnic groups from ever gaining citizenship (e.g. Ivoirité in Côte d'Ivoire).
 1. Land purchase was not restricted for any groups in society.
 2. Land purchase was restricted through a quota system.
 3. Land purchase was formally segregated for certain groups in society. E.g. persons from a certain ethnic group would not be allowed to buy premium land, etc.
- **[land_pre_other]** Have there been any other legal land restrictions or issues not covered by

the questions above? *Discuss briefly if yes.*

In the 10 years after conflict termination (or, if regime change, within the post-war regime):

- **[land_issue]** During war, was land ownership a source of discontent and politicization?
 1. No
 2. Yes: it was a source of discontent, but promises were not made during war about post-war land allocation.
 3. Yes: it was a source of discontent, and at least some armed groups during war promised to undergo post-war land reform.
- **[land_post_issue]** After war, was land ownership debated or discussed in national discourse?
 1. No
 2. Yes: people or groups in society discussed/demanded it, but the government did not.
 3. Yes: the issue was debated both in society and within the government. *Select this if politicians brought up the issue of land reform within parliament/cabinet/etc.*
- **[land_post_reform]** After war, did the government expand land access? (Yes = 1, No = 0. If yes, list years of reform)
- After war, how did the government treat land and property? *Code based on post-reform changes if reforms occurred. E.g. if war ended in 1980 but reform occurred in 1984, code based on post-1984.*
 - **[land_post_alloc_state]** At least a portion of the land was allocated by the state, i.e. the state rented land to people. (Yes = 1, No = 0)
 - **[land_post_alloc_local]** At least a portion of the land was allocated by local leaders, institutions, or processes. For example: traditional or religious leaders, democratic processes at the village/community level, etc. (Yes = 1, No = 0) *Select this option if there were communal lands or reservations.*
 - **[land_post_purch]** At least a portion of the land was available for purchase and private ownership (Yes = 1, No = 0)
- *Only if yes to allocations above.* After war, was land allocations restricted through:
 - **[land_post_alloc_seg]** Segregation (code for identity-based groups, such as ethnicity/tribe, race, or religion)? If policies exclude foreigners, code as restriction only if the country's citizenship laws prevent certain ethnic groups from gaining citizenship (e.g. Ivoirité in Côte d'Ivoire).:
 1. No segregation
 2. Land allocations was formally segregated for certain groups in society, but the groups that were affected are different than pre-war.
 3. Land allocations was formally segregated for certain groups in society, but the levels

- of restrictions decreased.
4. Land allocations was formally segregated for certain groups in society, and the levels of restrictions post-war increased. (*Select this if there was no segregation pre-war, but segregation was imposed after war*)
 5. Land allocations was formally segregated for certain groups in society, and the levels of restrictions post-war stayed the same.
- **[land_post_alloc_quota]** Quota (code for identity-based groups, such as ethnicity/tribe, race, or religion)? If policies exclude foreigners, code as restriction only if the country's citizenship laws prevent certain ethnic groups from gaining citizenship (e.g. Ivoirité in Côte d'Ivoire). :
1. No land allocations quota
 2. Land allocations was decided by quota, but the quotas shifted from pre-war.
 3. Land allocations quota was newly imposed after war.
- *If land avail for purchase.* After war, was purchase of land restricted through:
1. **[land_post_purch_seg]** Segregation (code for identity-based groups, such as ethnicity/tribe, race, or religion)? If policies exclude foreigners, code as restriction only if the country's citizenship laws prevent certain ethnic groups from gaining citizenship (e.g. Ivoirité in Côte d'Ivoire).:
 1. No segregation
 2. Land purchase was formally segregated for certain groups in society, but the groups that were affected are different than pre-war.
 3. Land purchase was formally segregated for certain groups in society, but the levels of restrictions decreased.
 4. Land purchase was formally segregated for certain groups in society, and the levels of restrictions increased. (*Select this if there was no segregation pre-war, but segregation was imposed after war*)
 2. **[land_post_purch_quota]** Quota (code for identity-based groups, such as ethnicity/tribe, race, or religion)? If policies exclude foreigners, code as restriction only if the country's citizenship laws prevent certain ethnic groups from gaining citizenship (e.g. Ivoirité in Côte d'Ivoire).:
 1. No land quota
 2. Land purchase was decided by quota, but the quotas shifted from pre-war.
 3. Land purchase quota was newly imposed after war.
 3. **[land_post_purch_restrict]** Purchase of land was completely restricted for any identity-based groups, such as ethnicity/tribe, race, or religion. If policies exclude foreigners, code as restriction only if the country's citizenship laws prevent certain ethnic groups from gaining citizenship (e.g. Ivoirité in Côte d'Ivoire). (Yes = 1, No = 0)

- **[land_post_alloc_vet]** Were ex-combatants given land as part of demobilization, reintegration, or retirement from military service? This may be part of a Disarmament, Demobilization, and Reintegration program (DDR) but it may also be implemented by the government separately from DDR. (Yes = 1, No = 0, year if yes)
- Did the post-war government expropriate land for the following reasons? Meaning that the government took control of land/property that was previously privately held or privately used. (Yes = 1, No = 0)
 - **[land_post_expro_dev]** For development purposes, i.e. to build infrastructure, etc. Specify if infrastructure was meant to be built by the government, by NGO/aid organization, or by an private company.
 - **[land_post_expro_redist]** For redistribution, i.e. to give the land to others. Specify which groups received, and on what basis.
 - **[land_post_expro_corr]** For rewarding supporters, i.e. corruption, rewarding own ethnic group/religious group, rewarding own family, etc.
 - **[land_post_expro_other]** For other reasons: explain
- **[land_post_expro_comp]** *If Yes to any of the above.* Were landowners compensated for their loss of land?
 1. No
 2. Yes, but the amount was significantly below the land's true value.
 3. Yes, and the amount was near or at the land's true value.
- **[land_post_expro_dev_who]** *If Yes to expropriation of development.* Was the development projects on expropriated land meant to benefit any specific group(s) of people? E.g. if new development was built only in one part of the country, land benefits accrued to identity-based groups, such as ethnicity/tribe, race, or religion (Yes = 1, No = 0, list groups if yes)
- **[land_post_expro_redist_who]** *If Yes to expropriation of redistribution.* Was the land redistributed primarily to the benefit of any specific group(s) of people, e.g. identity-based groups, such as ethnicity/tribe, race, or religion? (Yes = 1, No = 0, list groups if yes)
- **[land_post_housing]** Did the post-war government engage in housing reform, meaning that the government sought to increase housing for the population? Code based on government-conceived plans, not smaller-scale projects initiated by organizations (e.g. World Bank). However, note that government-conceived plans can still be financed by international organizations.
 1. Housing not mentioned
 2. Housing mentioned as a goal (e.g. during campaign speeches, etc.), but no policies

passed or implemented

3. Policies on *expansion* were formulated and passed (list year)
4. Policies on *restriction* were formulated and passed (list year)

- **[land_post_housing_build]** *If housing policies passed.* Did the policy entail expansion of housing, meaning that the government committed to building new housing? Code based on government-conceived plans, not smaller-scale projects initiated by organizations (e.g. World Bank). However, note that government-conceived plans can still be financed by international organizations. (Yes = 1, No = 0)
- **[land_post_housing_built]** *If housing policies passed.* Was there evidence of the government implementing housing reform? Meaning that they did engage in housing reform, not only that they discussed it or enacted policies. Code based on government-conceived plans, not smaller-scale projects initiated by organizations (e.g. World Bank). However, note that government-conceived plans can still be financed by international organizations.
 1. No
 2. Partially implemented: housing was built, but projects not fully implemented (*select this if government decided to stop building, or there was a clear abandoning of the projects*)
 3. Fully implemented (*select this if there was a clear attempt to build all housing planned, even if there are complaints about there still not being enough housing, etc.*)
- **[land_post_housing_years]** *If housing policies passed.* List all years in which the expansion was occurring, i.e. all years in which housing was being built as a result of the policy.
- **[land_post_housing_redist]** *If housing policies passed.* Did any policy entail redistributing existing housing, meaning that the government committed to paying for (or expropriating) existing housing and redistributing it to the population according to pre-determined criteria? (Yes = 1, No = 0)
- **[land_post_housing_slum]** Did the government attempt to demolish or remove slums or illegal settlements? (Yes = 1, No = 0; Year if yes)
- **[land_post_housing_illeg]** Did the government demolish or remove illegally-built housing that were *not* slums or illegal settlements? E.g. housing built on national/park lands, etc. (Yes = 1, No = 0; Year if yes)
- Did the government seek to resettle populations en masse—e.g. villagization, urban-to-rural farming programs, etc.—in any of the following ways? Do not code IDP, refugee, or ex-combatant resettlement that occurred due to international organizations' programming. (Yes

= 1, No = 0; Year if yes)

- [land_post_resettle_urb1] People living in urban areas were resettled within the same urban area (i.e. same city or its outskirts).
 - [land_post_resettle_urb2] People living in urban areas were resettled to another city.
 - [land_post_resettle_rur1] People living in rural areas were resettled to a nearby rural or semi-urban community.
 - [land_post_resettle_rur2] People living in rural areas were resettled to a far away rural or semi-urban area.
 - [land_post_resettle_urbrur] People living in urban areas were resettled to rural areas.
 - [land_post_resettle_rururb] People living in rural areas were resettled to urban areas.
- [land_post_other] Have there been any other changes to policies or laws governing land and housing that have not been covered above? *Discuss briefly if yes.*

Other (All after conflict termination)

Constitution

- **[const_discuss]**: Was a new Constitution discussed? (Yes = 1, No = 0). *Discuss briefly the main issues/reforms sought if yes.*
- **[const_interim]**: Was an interim Constitution put in place? (Yes = 1, No = 0; year if yes)
- **[const_passed]**: Was a new Constitution passed? (Yes = 1, No = 0; year if yes) *Discuss briefly the proponents and/or opposition to new Constitution, and how the new Constitution was influenced by or related to the civil war.*

Decentralized development

- Did the government *reorganize* development for the purposes of decentralizing development decisions?
 - **[dec_bureaucracy]**: Development committees were formally created at the local level (e.g. at village or community levels)? (Yes = 1, No = 0; Year if yes)
 - **[dec_decision]**: Communities were allowed to propose, co-develop, or vote for preferred development projects (Yes = 1, No = 0)
